# REMINDER: IMPORTANT NOTICE

## WATER CONSERVATION NOTICE for VILLAGE OF SAYWARD

Recent heavy rains have resulted in high water flows in Newcastle Creek causing high turbidity.

Consequently, Sayward's Water Treatment Plant was offline until the turbidity levels decreased to a level where drinking water production could resume.

The Water Treatment Plant is now operational; however, reservoir levels remain low. We are asking all residents of Sayward to continue conserving water by limiting use to essential needs only, such as drinking water, food preparation, and basic sanitation. Your continued efforts will help protect our water supply and allow reservoir levels to recover.

We expect this situation to be short-term and hope to have optimal reservoir levels within 24-36 hours.

We thank you for your understanding and cooperation.

Andrew Young, MCIP, RPP
Chief Administrative Officer
Village of Sayward
