

Good afternoon everyone,

Since July 5<sup>th</sup>, 2021, highway maintenance related to mowing & brushing have been shut down due to the Extreme Fire Danger Rating – these activities are deemed High Risk per the BC Wildfire Regulation.

Now that the risk of fire has fallen and weather temperatures are cooling throughout the Service Area, we have fully deployed crews and resources to safely perform brushing maintenance. To enhance our safety measures and with approval from the Province, Mainroad sourced additional water spray equipment to mowing and brushing operations.

*Thank you for your patience as we perform this work over the next few months!*

*\*See attached advisory for further information and thank you for sharing this information through your communication channels ~ much appreciated!*
