

the Village of
Sayward

NOTICE

This is to inform village residents that effective immediately a

Boil Water Advisory is in Effect

This Advisory is expected to be in effect until the end of September.

The reason for the advisory is that the dam removal/intake replacement project begins this week, August 06, and residents can expect to see periods of turbidity as work progresses. This project will be complete by the end of September.

As a further update: The Water Treatment Plant project is nearing completion. We expect operational testing to begin shortly which will result in an operating permit being issued by Vancouver Island Health before the end of August at which time the plant will begin delivering water to the village.

THANK YOU FOR YOUR PATIENCE.
